

KwikFold

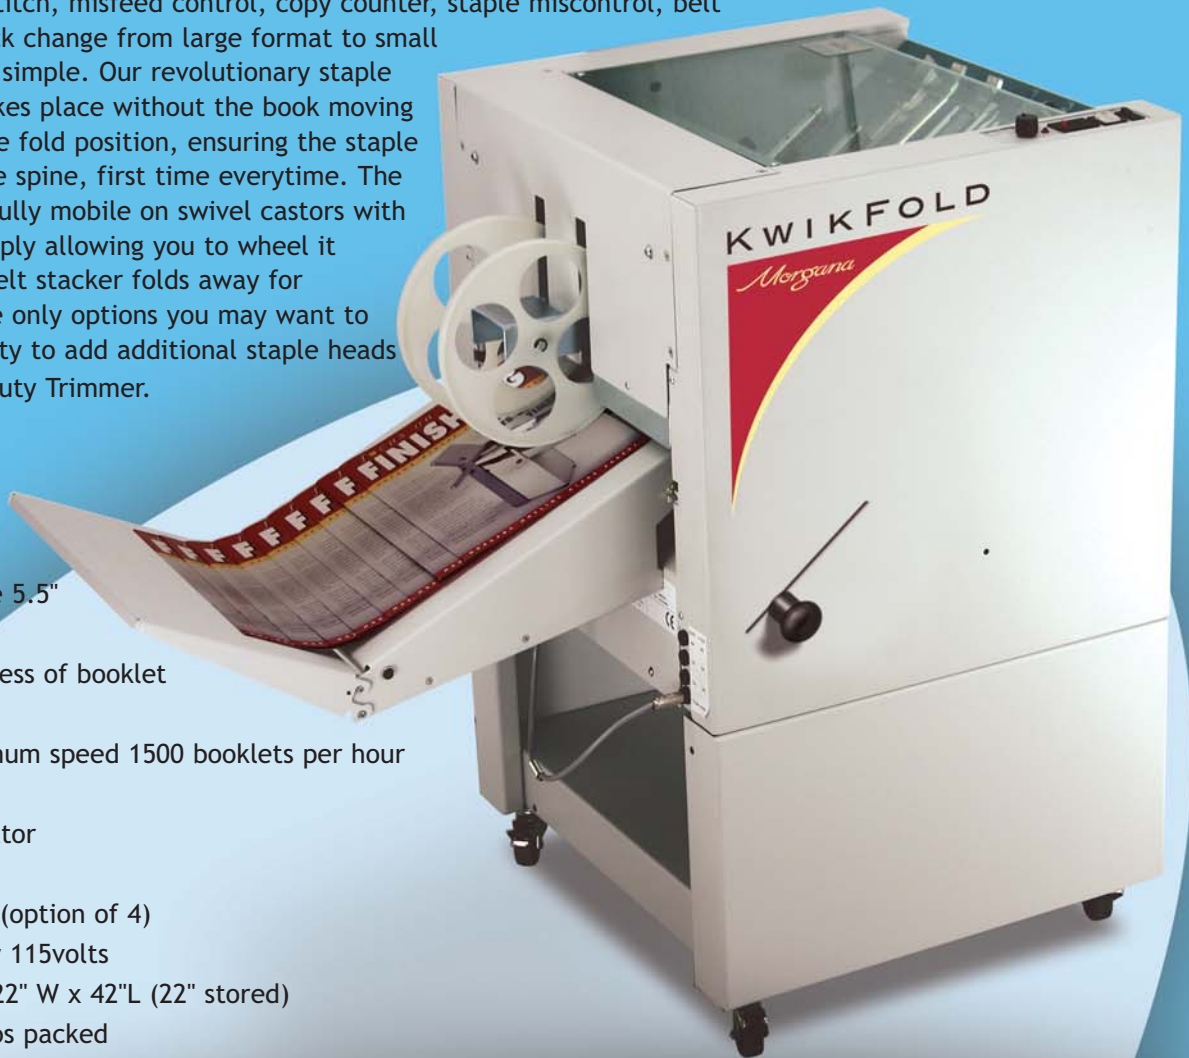

Morgana

The Morgana KwikFold is a popular midrange bookletmaker, capable of providing upto a 100 page booklet on 20lb stock. The KwikFold copes with heavier coated stocks just as easily, but naturally produces a slightly thinner finished booklet.

As you would expect from Morgana, the KwikFold comes fully loaded with standard features that are usually only offered as expensive options. Customers can produce professionally finished booklets with the minimum of effort. These necessary features include: automated side jogging and positional sheet sensors for correct alignment, clinched moving anvils to give a flat stitch, misfeed control, copy counter, staple miscontrol, belt delivery stacker. Quick change from large format to small booklets is quick and simple. Our revolutionary staple and folding action takes place without the book moving from the staple to the fold position, ensuring the staple is in the center of the spine, first time everytime. The Morgana Kwikfold is fully mobile on swivel castors with a plug in 115 volt supply allowing you to wheel it where you want it. Belt stacker folds away for compact storage. The only options you may want to consider are the ability to add additional staple heads or the online heavy duty Trimmer.
