

Morgana...

...setting the standard in digital print finishing

Since the world's largest Printing Exhibition Drupa 2000, when it launched the unique AutoCreaser, Morgana has quickly established an international reputation as a leader in the development of finishing systems for digital print applications.

The AutoCreaser is now an established best seller throughout the world, as is the DigiFold, another breakthrough product that combines the operations of creasing and folding. Morgana has also introduced new folders and complete bookletmaking systems for the on-demand market that combine fast set-up, high levels of automation and great simplicity of operation.

DocuMaster
A fully intelligent feeder, creaser & bookletmaker taking work from the digital printer.

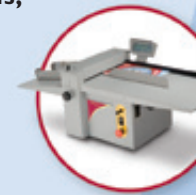

DigiFold™
Morgana's unique combination of patented creasing & folding technology in one unit.

AutoCreaser50™
Taking larger sizes and operating faster than the original best-seller. Also perforates as standard equipment.

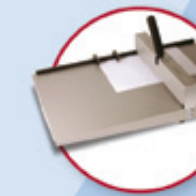

AutoCreaser™
The AutoCreaser 33 is the original best-seller. Also perforates as standard equipment. Counting and batching included.

DigiCreaser™
Brand new fully programmable creaser filling the gap between fully and semi automatic systems, also perforates as standard equipment.

Electro-Creaser™
Semi-automatic for single or multiple creases. Also 14.5" & 20.5" sizes. Automatic activation from a foot pedal.

Docu-Crease™
Market entry quality hand operated creasers available in 2 widths

From the entry level Docu-Crease through to the DocuMaster total finishing system, Morgana offers efficient and cost effective solutions to all digital finishing requirements.

And to ensure that customers have a clear UPGRADE PATH to meet future finishing needs, Morgana also operates a guaranteed buy-back program on all creasing products.

FOLDING - NUMBERING - CREASING SYSTEMS

Morgana Major Folder

Seen for the very first time at Drupa, the Morgana Major combines extremely fast set-up with high speeds - up to 27,000 sheets per hour - and the ability to take sheet sizes up to 25.5" x 14.3". Also includes Plug-in perforating and scoring.

Morgana Docu-Fold™

This is the most highly automated suction feed folder available and is designed specifically for the on-demand market. Simple controls adjust fold plates as required and settings can be memorised for repeat work.

Morgana Kwikfold + Trimmer

As you would expect from Morgana, the Kwikfold comes fully loaded with standard features that are usually only offered as expensive options. It allows customers to produce professionally finished booklets with the minimum of effort.

Picture shown with optional Trimmer

Morgana DocuMaster™

A fully intelligent feeder, creaser & bookletmaker taking work direct from the digital printer

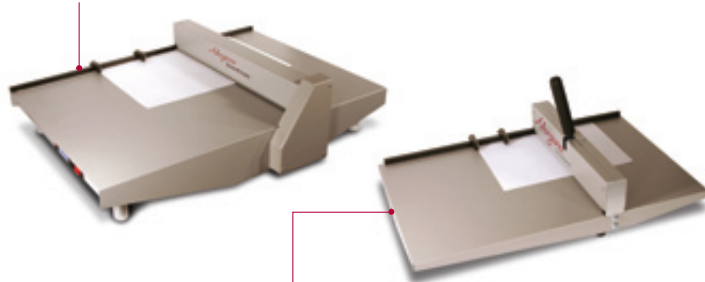

Morgana FSN + Jogger & FRN5

Morgana's rotary numbering system ensures the highest standards of numbering quality. There are two models - the Morgana FSN, which operates at 9000 sheets/sets per hour and compact FRN5, which runs at 5,500 sheets/sets per hour. Both offer numbering, perforating and scoring anywhere on the sheet.

Morgana Electro-Creaser™

Available in 14.5" and 20.5" widths, this latest creaser in the Morgana range is ideal for the printer who wants something faster than a hand creaser, but doesn't handle the volumes to justify an automated unit like the AutoCreaser.

Morgana Docu-Crease™

Market entry quality hand operated creasers available in 2 widths

Morgana DigiFold

The revolutionary Morgana DigiFold is the world's first integrated creaser and folder. The perfect finishing partner for the digital printer, it incorporates new, patented folding technology that handles the most sensitive material without damage. The DigiFold is easy to set up and minimises make-ready time and wastage.

Morgana AutoCreaser 50

The Morgana Autocreaser's are available in two widths 13" and 19.5". This latest model is designed for printers who need to crease a larger sheet size - up to 19.5" x 27.5" - and work at higher speeds. Sophisticated controls include a 'head up' display that shows a series of prompts to guide the operator through functions such as crease position, batch size and desired method of feeding.

Morgana DigiCreaser

Brand new fully programmable creaser filling the gap between fully and semi automatic systems, also perforates as standard equipment.

Morgana DigiCutter

The 20.5" DigiCutter is a fully programmable cutter and is another unique innovative product available within the Morgana portfolio, that is designed specifically to handle digital and litho printed stock.
