

# Morgana...

...setting the standard in digital print finishing

Since Drupa 2000, when it launched the unique AutoCreaser, Morgana has quickly established an international reputation as a leader in the development of finishing systems for digital print applications.

The AutoCreaser is the established best selling automated creasing machine throughout the world, as is the DigiFold, another breakthrough product that combines the operations of creasing and folding. Morgana has also introduced new folders for the on-demand market that combine fast set-up, high levels of automation and great simplicity of operation.

Morgana digital finishing machines are supplied throughout the USA via our network of factory trained dealers. Please visit [www.morganausa.com](http://www.morganausa.com) to find your local dealer.

FOLDING · NUMBERING · CREASING SYSTEMS

### Morgana Major Folder

The Morgana Major air feed folder combines extremely fast set-up with high speeds - up to 27,000 sheets per hour - and the ability to take sheet sizes up to 25.5" x 14.3".

### Morgana Docu-Fold™

This is the most highly automated air feed folder available and is designed specifically for the on-demand market. Simple controls adjust fold plates as required and settings can be memorised for repeat work.

### Morgana Kwikfold + Trimmer

As you would expect from Morgana, the Kwikfold comes fully loaded with standard features that are usually only offered as expensive options. It allows customers to produce professionally finished booklets with the minimum of effort. Picture shown with optional Trimmer.

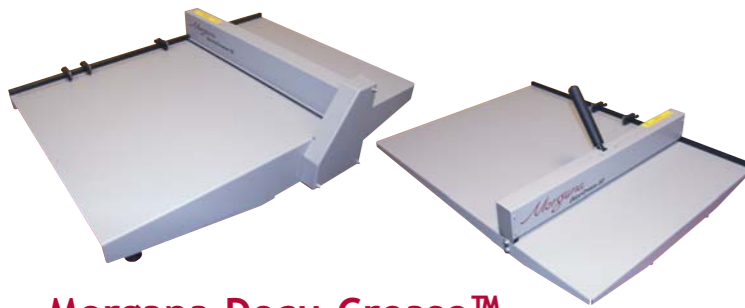

### Morgana DocuMaster™

A fully intelligent feeder, creaser & bookletmaker taking work direct from the digital printer

### Morgana Electro-Creaser™

Available in 14" and 20" widths, this latest creaser in the Morgana range is ideal for the printer who wants something faster than a hand creaser, but doesn't handle the volumes to justify an automated unit like the AutoCreaser.

### Morgana DigiFold™

The revolutionary Morgana DigiFold is the world's first integrated creaser and folder. The perfect finishing partner for the digital printer, it incorporates new, patented folding technology that handles the most sensitive material without damage. The DigiFold is easy to set up and minimises make-ready time and wastage.

### Morgana AutoCreaser 33/50™

Available in 13" and 19.7" widths. Launched at Drupa 2000 the AutoCreaser has become a massive world-wide best seller, thanks to its ability to provide high speed, automated creasing of digital output prior to folding. Perforating is supplied as standard.

### Morgana Docu-Crease™

A hand operated creaser available in widths of 20" and 14".

### Morgana DigiCreaser™

Brand new computer aided creaser filling the gap between semi and fully automatic systems.

### Morgana FSN + FRN5

Morgana's rotary numbering system ensures the highest standards of numbering quality. There are two models - the Morgana FSN, which operates at 9000 sheets/sets per hour and compact FRN5, which runs at 5,500 sheets/sets per hour. Both offer numbering, perforating and scoring anywhere on the sheet.

### Morgana DigiCutter

The 20.5" DigiCutter is a fully programmable cutter and is another unique innovative product available within the Morgana portfolio, that is designed specifically to handle digital and litho printed stock. can be memorised for repeat work.
